

Mailaram Anand Raj

Software Engineer | Backend & Full-Stack Development
+91 7981615964 | anandrajm1603@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Software Engineer with backend development experience across full-time and internship roles at Accenture, building enterprise applications using Java, Node.js, and REST APIs. Skilled in RDBMS (MySQL, Oracle SQL/PL-SQL), Git, and AWS deployments. Experienced in debugging production issues across Dev/Test/Prod and collaborating in Agile cross-functional teams. Currently strengthening SpringBoot and full-stack development; 260+ DSA problems solved on LeetCode.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, PL/SQL, C++

Backend & Frameworks: SpringBoot, Node.js, Express.js, REST APIs

Frontend: JavaScript, HTML, CSS, ReactJS (familiar)

Databases: MySQL, Oracle (SQL, PL/SQL), RDBMS design

Cloud & DevOps: AWS, CI/CD concepts, Maven, environment configuration

Tools & Practices: Git, Postman, Agile/Scrum, debugging, unit testing, code reviews

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

Software Engineer

Accenture

Backend Development • Enterprise Applications

Oct 2025 – Present

- Developed and maintained backend components for enterprise applications, including web scraping systems and search modules, using Java and REST APIs.
- Debugged production issues by identifying root causes and implementing code-level fixes and configuration updates across Dev, Test, and Prod environments.
- Deployed and configured applications on AWS cloud, managing environment-specific configurations to ensure stable releases.
- Collaborated with cross-functional teams in an Agile environment to ensure smooth application performance and timely delivery of features.

Software Engineering Intern

Accenture

Backend & Database Development

Feb 2025 – Jun 2025

- Built backend logic and database procedures using SQL and PL/SQL, optimizing queries to improve data retrieval efficiency.
- Developed and tested application workflows in the Oracle APEX cloud environment, gaining exposure to the full software development lifecycle.
- Implemented automation workflows using Tricentis Tosca, focusing on test case design and execution.

PROJECTS

AI Writing Assistant | Python, Flask, REST APIs, NLP

- Built a multi-service application supporting translation, grammar correction, paraphrasing, and content generation, exposing backend functionality through Flask REST APIs.
- Integrated multiple third-party services (NLP libraries and translation APIs) with error handling for reliable multi-language text processing.

SpringBoot REST API Service | Java, SpringBoot, MySQL, Maven

- Developed a RESTful CRUD service using SpringBoot and MySQL with layered architecture (controller, service, repository) and dependency injection.
- Tested endpoints with Postman and managed the build using Maven, reinforcing backend fundamentals aligned with enterprise Java development.

Dynamic Quiz Application | Node.js, Express.js, REST APIs

- Designed RESTful endpoints to fetch quiz categories and dynamically generate questions via external APIs, with logic for option randomization and response evaluation.

EDUCATION

B.Tech, Information Technology

2021 – 2025

B.V. Raju Institute of Technology, Telangana

CGPA: 7.78

ACHIEVEMENTS & ACTIVITIES

- Solved 260+ Data Structures & Algorithms problems on LeetCode; strong in arrays, hashing, sliding window, and recursion.
- Volunteer, Street Cause Hyderabad — coordinated logistics for fundraising initiatives that raised ₹98 lakhs for underprivileged communities.
